Keylogger Software - KeyLog Pro Named Editor's Pick at Spy Tools Directory

Key Logging Software Program Offers Great Features, Performance for Under \$20

5/12/04 - [KeyLog Pro](http://www.keyloggingsoftware.net) (<http://www.keyloggingsoftware.net>), a key logging software program has been named an 'Editor's Pick' by the editorial staff of the Spy Tools Directory, based on its feature performance and overall value. The product is listed in the '[Key Logging Software](#)' sub-category of the '[Spy Software](#)' section on the website.

"We haven't found a better program at that price," stated Steve Salm, lead editor for the Directory. "This program competes with any of the high-end keylogger systems out there - both feature and performance wise - at a fraction of the cost of those other systems."

[KeyLog Pro](#) runs secretly in the background on any computer its installed on, and records all PC activity, including all keystrokes typed in both email and chat programs.

"It does what it's supposed to," explained Salm. "Our editors were completely satisfied with the program's [key logging](#) performance, which is why we decided to make it an '[Editor's Pick](#)' for its respective category."

The 'Editor's Pick' award is bestowed upon products, items, or websites determined by the editors of the Spy Tools Directory to be of exceptional value to its visitors.
