SpyBuddy Keylogger Named Editor's Pick at Spy Tools Directory

Key Logging Software Provides Performance, Value To Users

10/08/05 - [SpyBuddy](#), the keylogging software program, has been named an "Editor's Pick" at the Spy Tools Directory (<http://www.spy-tools-directory.com/spy-software/key-logging-software.html>) the site announced today.

"We've had a lot of interest in this particular product through our website, and based on its overall customer feedback rating and well-placed price point, we feel making it an Editor's Pick is an obvious decision", said Steve Salm, lead editor for the Directory.

[SpyBuddy](#), one of the most downloaded keylogger (or key logging) software programs on the Web, allows the user to monitor all areas of a PC - tracking every action down to the last keystroke pressed. With the ability to log all AOL/ICQ/MSN/AIM/Yahoo chat conversations, all websites visited, all windows opened and interacted with, every application executed, every document printed, all text and images sent to the clipboard, and even every keystroke, including system keys, [SpyBuddy](#) outperforms other programs and does it at a lower price point.

"[SpyBuddy](#) is worth checking out if you're in the market for a complete key logging software package, without spending a ton of money," continued Salm.

The 'Editor's Pick' award is bestowed upon products, items, or websites determined by the editors of the Spy Tools Directory to be of exceptional value to its visitors.
