Fight Red Light Camera Tickets at The Spy Tools Directory

*New Spy Gadget Category Features Products
Which Render License Plates Invisible to Traffic Cameras*

10/03/06 - Drivers weary of receiving traffic tickets in the mail after being caught by traffic cameras now have a way to fight back - legally - according to the Spy Tools Directory. [Photo blocking sprays](http://www.spy-tools-directory.com/spy-gadgets/photoblocker.html) (<http://www.spy-tools-directory.com/spy-gadgets/photoblocker.html>) for license plates that render the plate unreadable to traffic and red light cameras, yet visible to other drivers and law enforcement.

"There's no law that says a vehicle's license plate has to be photogenic, it just has to be visible," says Steve Salm, lead editor for the directory. "The products in this new category use technology to make a license plate appear either too reflective or distorted for cameras to get a clear photo of, yet remain visible to other drivers."

One of those products, a clear-coat spray has been tested by law enforcement and media organizations and was proven to be one of the most effective available on the market.

In addition to the [photo blocking spray](#), the new category also features photo distorting license plate covers, and resources on [how to fight traffic tickets](#) in court.

Websites featuring similar products that would like to be included in this new category are encouraged to submit their link information for inclusion via the Spy Tools Directory add url form.
