Record Cell Phone Calls at Spy Tools Directory

Online Spy Technology Resource Offers Tools for Recording Cell Phone Conversations

04/10/07 - Cell phone users looking for a way to digitally record cell phone calls may now find tools and resources enabling them to do so at the Spy Tools Directory via the newly created "[Record Cell Phone Calls](http://www.spy-tools-directory.com/surveillance-equipment/record-cell-phone-calls.html)" category (<http://www.spy-tools-directory.com/surveillance-equipment/record-cell-phone-calls.html>), the site announced today.

"People use their cell phones while constantly on the go in today's world," said a spokesperson for the Directory, "And their attention may not always be focused on exactly what is said during every conversation. Having a digital voice record of each cell phone call allows the user to review each call and go over details that may have been missed."

The new "[Record Cell Phone Calls](http://www.spy-tools-directory.com/surveillance-equipment/record-cell-phone-calls.html)" category features phone recorder cards which allow users to record cell phone calls and play back the conversations via voicemail system or through any PC with an Internet connection.

"It's a feature that we believe will become standard on all cell phones the future," the spokesperson continued. "Whether for business calls or investigations, the technology to [record cell phone calls](http://www.spy-tools-directory.com/surveillance-equipment/record-cell-phone-calls.html) is definitely in demand."
